

IPM 2021/2022

Assignment 1

Bad design

The default Windows 10 menu's objective is to have relevant applications just a few clicks away. However, the different sized icons and general cluttered aspect of the right side is, to me at least, very off putting and not practical. It was probably designed this way to have a lot of information in one central area but in my opinion, it would be a big improvement to just remove the right side entirely or dedicate it to recently accessed files.

Good design

These baby gates are meant to keep babies off stairs and other dangerous areas while allowing the passage of adults without being a hindrance. Since they are very simple looking and the only focus point for your eyes to look at is the red button with a handle on top you can immediately understand what you have to do to open them, while not allowing a child to reach it because of its height.
